DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-13 and 22-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitation “the accepted combiner channel assignments”, last line, lacks of proper antecedent basis.

Claim 22, line 6, recites “the soft symbols” there is no antecedent basis for such limitation as claimed. The same comment applies claim 23, line 6.

Note that any claim whose base claim is rejected is likewise rejected.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

Art Unit: 2631

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1, 14 and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Kumar et al US Patent No. 6,097,954.

Kumar discloses a system, see for instance figs. 4 and 5, having a plurality of demodulator fingers (42-1)-(42-n), each having an input for receiving a sample stream from antenna 34, an output (a soft decision output) to supply a combined signal (soft symbols) associated with demodulated information channels at the output of combiner 43 and a second output for supplying pilot channel signals considered as the claimed (channel assignment output) for associated output signals (soft symbols) see fig. 5 and col. 4, line 53-col. 5, line 13.

Allowable Subject Matter

5. Claims 15-21 are allowed over the prior art of record.

6. Claims 2-13 and 23-31 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Art Unit: 2631

Response to Arguments

7. Applicant's arguments with respect to claims 1, 14 and 22 have been considered but are moot in view of the new ground(s) of rejection.
